TECHNICAL SPONSOR AND SUPPORT

Welcome to the 10TH IET SMART CITIES SYMPOSIUM 2026, 10th IET -SCS-26. An annually run IET symposium related to development of smart innovations for smart cities. The symposium objectives are to create awareness through research and publications about the prospects of smart cities. The symposium also serves as a platform to exchange ideas and thoughts in international prospect and stand. In addition, the symposium is emphasizing the role of academia, universities, industries, experts, and innovations for promoting smart cities solutions, projects, smarter ideas, consultancies and continuity in the form of indexed publications. The 10th IET International Smart Cities Symposium will be held at the University of Bahrain, Bahrain, on December 1-3, 2026. The symposium will feature world-class plenary speakers, major technical symposiums, industry and academic panels, and invited tracks. You are cordially invited to join your latest research work to the symposium. Best paper awards will be selected from accepted papers. The symposium and tracks papers will be published and indexed in IET Inspec - IEEE Xplore and will appear on other indexing databases.

Smart City is an Open Season Hunting for attackers

19 YEARS … AND WAY FORWARD WITH A SENSE OF A PURPOSE:

The first IET forum at the University of Bahrain has started since 2008. The first IET Smart Systems International Conference was also during 2008. Since the year 2008, we have been organizing the local IET forums and then indexed Symposiums in an annual basis at University of Bahrain.

As annually planned, also this year of 2026, the University of Bahrain; 10th Smart Cities Symposium (1-3 December 2026) is also organized with collaboration of the IET, (The Institution of Engineering and Technology), UK.

Smart Cities is a new and emerging concept that have received a substantial attention for a while. This is because of the fast development of Engineering Concepts, IT and ICT sectors. Smart cities are a used term used to define employment of smart technologies and data as the means to solve cities' sustainability challenges and prosper. In this sense, many cities are in the process of transforming themselves to be smart. This can be achieved while relying on and using data and technology to improve several sectors. Sectors that are applicable for such transformations are:

{Transport, Energy use, Health issues, Health care, and Air quality, or to Drive economic growth}. Others are being built to be smart from the start. This is a term that relates to the present and to the future. Nevertheless, in general notion, cities world-wide consume substantial resources and global energy supply, which make them much under demand to be transformed to smart. Reports are also showing that, there are growing numbers of the world's natural resources, global energy supply, healthcare issues, the need of fast and easy transports, and easy health care. In addition, over the coming twenty years, it is expected that cities worldwide will generate not less than 60 per cent of global GDP. In this sense there are potentials that, Engineering and High Technologies will help and participate to resolve several issues and demands of current cities. The regional infrastructure, and the ICT backbone, are developing very fast, that makes the concept of smart cities are very applicable concepts locally. Therefore, the event will be an excellent platform and a site for energetic and dynamic discussions between locally demanding parties, possible international experts, and the community of academics, decision makers, researchers, practitioners, real estate developers in Bahrain, investors, and policy makers from the urban spheres. This is all with the aim to explore such emerging trends and innovative solutions to green and smart cities within the region.

The main purpose of the event is to create awareness about the prospects of Smart Cities. The event will serve as a platform to exchange ideas and throughout in an international prospect. The event objectives are also in emphasizing the role of academic institutions in promoting a smarter kingdom via its consultancy, building smarter ideas or continuity in the form of publications, and creating innovative solutions. In addition, such organization of the event, will also focus on networking opportunities, and that the event is a good starting point and could help in making networking opportunities for smart cities. The event venue (the symposium) will be at University of Bahrain, and will run for three days, 1-3 December 2026. The symposium will involve both invited speakers (talking about load needs for smart cities), in addition to academic submitted papers (with review), as they will be published afterward within the IET (once satisfying the needed technical standards of the IET).

The event is also to create awareness about the prospects of Smart Cities. The symposium is a platform to exchange ideas and thoughts in international prospects. The symposium is a platform for emphasizing the role of academia in promoting Smart Cities, Digital Twins of Cities, Projects, Smarter Ideas, and Consultancies. The symposium is a platform for research community in forms of publications and creating innovative solutions.

RESILIENT HYBRID ENERGY SYSTEMS AND DIGITAL TWIN FOR ENERGY TRANSITION AND SUSTAINABLE COMMUNITIES

Professor Hossam A. Gabbar,
P.Eng., Fellow IET (FIET), Distinguished Lecturer IEEE NPSS, Director of Smart Energy Systems Lab, Ontario Tech University
Faculty of Engineering and Applied Science, Ontario Tech University, Canada.

Session Chair: Dr. Suresh Vishwakarma, MIET, Lead Engineer, Vancouver, Canada.

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

This talk will present the integration of renewable within hybrid energy systems (HESs) to support energy transitions. Different design and coupling mechanisms will be presented to support different installations and user requirements of resilient hybrid energy systems. Development of digital twin and multidimensional simulation are used to evaluate optimum control strategies for different HES models with microgrids and hybrid energy storage systems. Digital twin and Hardware-in-the-loop are demonstrated for accurate analysis of operation strategies and various technologies will be discussed for practical deployment of hybrid energy systems and their use for different applications in city, urban, transportation, remote communities, waterfront, and marine applications. Performance measures are proposed to evaluate different strategies. The talk will include techno-economic evaluation of interconnected HESs with electric, thermal, and fuel energy systems, and their impacts on a number of implementation strategies. Control strategies and optimum control systems will be illustrated to deploy hybrid energy systems, with considerations on scalability, capital cost, project lifetime, and other implementation parameters. Hydrogen technologies will be discussed, including small- and large-scale integration with other energy grids, and HESs. Resiliency and performance measures will be discussed in view of a number of operation and control strategies to meet user requirements.

SPEAKER DETAILS: PROFESSOR HOSSAM A. GABBAR:

Professor Gabbar is a full Professor in the Department of Energy and Nuclear Engineering, the Faculty of Engineering and Applied Science, at Ontario Tech University (UOIT), where he has established the Energy Safety and Control Lab (ESCL), Smart Energy Systems Lab, and Advanced Plasma Engineering Lab. He is the recipient of the Senior Research Excellence Aware for 2016, UOIT. He is recognized among the top 2% of worldwide scientists with high citation in the area of energy. He Fellow IET (FIET) and Distinguished Lecturer – IEEE NPSS on Nuclear-Renewable Hybrid Energy Systems and Plasma-based Waste-to-Energy. He is leading national and international research in the areas of smart energy grids, energy safety and control systems, and waste-to-energy using advanced plasma technologies. Professor Gabbar obtained his B.Sc. degree in 1988 with first class of honor from the Faculty of Engineering, Alexandria University (Egypt). In 2001, he obtained his Ph.D. degree from Okayama University (Japan). From 2001 till 2004, he joined Tokyo Institute of Technology (Japan), as a research associate. From 2004 till 2008, he joined Okayama University (Japan) as an Associate Professor, in the Division of Industrial Innovation Sciences. From 2007 till 2008, he was a Visiting Professor at the University of Toronto. He also worked as process control, safety, and automation specialist in energy and oil & gas industries. Dr. Gabbar has more than 290 publications, including patents, books / chapters, journal and conference papers. Professor Hossam Gaber has been collaborating with Japan and Indonesia to promote nuclear-renewable hybrid energy systems, where he was invited to the panel discussions in Indonesia as part of IAEA and was the representative of Canada in IAEA to develop the roadmap of nuclear-renewable hybrid energy system deployments with different energy scenarios based on regional resources and requirements. Dr. Gaber developed novel integrated hybrid energy system simulator to synthesize and optimize different nuclear-renewable scenarios and evaluate different nuclear power plant and SMR technologies based on energy load profiles and local resources. Dr. Gaber prepared nuclear deployment strategies and training programs, and explored in different countries including Canada, USA, Indonesia, UK, Norway, South Africa, Brazil, Egypt, UAE, and Hungary. Dr. Gaber has presented his scholarly research in Wisconsin, Budapest, Tokyo, Cairo, Jakarta, and other cities around the world. Dr. Gaber is also leading national research related to radioactive waste for SMR deployment as part of University Network of Nuclear Engineering (UNENE), Canadian National Laboratory (CNL), Ontario Power Generation (OPG), and NSERC. His research led to patents and products in the market with industrial applications and projects.

BUILDING SMARTER CITIES FOR BETTER MENTAL HEALTH: BALANCING INNOVATION WITH HUMAN CONNECTION

Speaker: Dr. Simmi Narula
Psychiatric Mental Health Nurse Practitioner based in Connecticut,
DNP, PMHNP-BC, Connecticut, USA.

Session Chair: DR. FAHD SAUD MIRA, UNIVERSITY OF BEDFORDSHIRE, UK.

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT

Dr. Simmi Narula will explore the evolving role of smart cities in transforming healthcare through connected technologies and digital innovation in her keynote address. Her presentation will highlight how intelligent healthcare ecosystems can improve population health, strengthen public health surveillance, enable earlier identification of at-risk individuals, and support more proactive, preventive, and personalized mental healthcare. Her keynote will also examine the ethical, clinical, and societal challenges associated with rapid technological advancement. The topics will include data privacy and security, increasing dependence on digital systems, reduced face-to-face interaction, social isolation, technology-related anxiety, sleep disturbances, and the broader psychological impact of living in an increasingly connected world. Drawing on her clinical expertise and frontline experience in psychiatric mental healthcare, Dr. Narula will present a balanced perspective on the opportunities and limitations of emerging technologies. She will emphasize that while innovations such as artificial intelligence, predictive analytics, electronic medical records, and digital health platforms have the potential to enhance healthcare delivery, they should complement, not replace the human connection that remains fundamental to effective mental health treatment.

SPEAKER DETAILS: DR. SIMMI NARULA

Dr. Simmi Narula, DNP, PMHNP-BC, is a Psychiatric Mental Health Nurse Practitioner based in Connecticut, USA. She has extensive experience in community-based mental health, integrated behavioral healthcare, and the application of technology to enhance patient outcomes. Dr. Narula is committed to delivering compassionate, evidence-based psychiatric care to diverse populations while advocating for equitable access to high-quality mental healthcare. Throughout her career, Dr. Narula has developed and led community wellness initiatives, including Resilience Programs at Our Lady of Fatima School and the Mindfulness Through Drumming & Movement program at the Norwalk and Darien Senior Centers in the United States. As a clinician, speaker, and thought leader, Dr. Narula is passionate about the convergence of smart cities, digital health, and behavioral healthcare. She explores how emerging technologies can transform healthcare delivery while addressing the growing mental health needs of modern communities. Her work focuses on leveraging electronic medical records (EMRs), health data analytics, artificial intelligence, predictive modeling, and digital health platforms to enable earlier identification of at-risk individuals, strengthen care coordination, enhance preventive interventions, and reduce disparities in access to healthcare.

PARALLEL SESSIONS

DAY -I: Tuesday, December 1 10:30 - 13:00 (Asia/Bahrain):

PARALLEL SESSION: SA01: INTERNET OF THINGS AND SMART APPLICATIONS-PART-A:

SESSION JOINING: HALL-A

SESSION CHAIR: MS. RISHIKA BILLORE.

10:30 1571321559: FedTRA: A Root-Free Broad-Spectrum Robust Aggregation Rule for Poisoning-Resilient Federated Intrusion Detection in IoT Networks.
Dr. Abeer Saleh Alshammari, Dr. Abeer Saleh Alshammari (CTU & Hi Conception, USA).

10:45 1571345906: An IoT-Enabled Multi-Sensor Child Presence and Heat-Risk Detection System for Smart Urban Mobility.
Dr. Wan Nur Azhani Wan Samsudin; Ms. Amala Nanthagopal; Mr. Mohd Harizan Zul; Dr. Rajkumar Palaniappan; Dr. Wan Syahirah Wan Samsudin; Dr. Raseeda Hamzah, Dr. Wan Nur Azhani Wan Samsudin (Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia), Ms. Amala Nanthagopal (Universiti Malaysia Pahang Al-Sultan Abdullah), Mr. Mohd Harizan Zul (ADTEC JTM Campus Jerantut, Malaysia), Dr. Rajkumar Palaniappan (University of Technology Bahrain, Bahrain), Dr. Wan Syahirah Wan Samsudin (Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia), Dr. Raseeda Hamzah (Universiti Teknologi MARA Cawangan Melaka, Malaysia).

11:00 1571354447: Design and Experimental Evaluation of a Layered Security Architecture for Smart City Network Infrastructure>
Ms. Harkiran Kaur; Ms. Tanishka Nagpal; Dr. Shilpi Sharma, Ms. Harkiran Kaur (Amity University Noida, Uttar Pradesh, India), Ms. Tanishka Nagpal (Amity University, Noida, Uttar Pradesh India, India), Dr. Shilpi Sharma (Amity University, India).

11:20 1571357396: AI-driven IoT Forensic Framework for Detecting Anomalous Activities in Smart Home Networks.
Dr. Faizal Hajamohideen, Dr. Faizal Hajamohideen (University of Technology and Applied Sciences, Oman).

11:40 1571352335: QUASAR-7G: Quantum-Inspired Agentic Route-Radio-Edge Orchestration for Prospective 7G Smart-City Emergency Mobility.
Dr. Pronaya Bhattacharya; Mr. Shaon Bandyopadhyay; Mr. Pramijeet Bhattacharjee; Dr. Rabel Guharoy, Dr. Pronaya Bhattacharya (Amity University, Kolkata, India), Mr. Shaon Bandyopadhyay (Amity School of Engineering and Technology, India), Mr. Pramijeet Bhattacharjee (Amity University, India), Dr. Rabel Guharoy (Galgotias College of Engineering and Technology, India).

12:00 1571347832: Calibrated Abstention Lightweight Machine Learning for Reliable Smart City IoT Routing.
Mr. Kumeel Rasheed; Dr. Naila Azhar; Mr. Sagedur Rahman; Mr. Chenhao Cai, Mr. Kumeel Rasheed (Shenzhen University, China), Dr. Naila Azhar (The Hong Kong University of Science & Technology, Hong Kong), Mr. Sagedur Rahman (Shenzhen University, China), Mr. Chenhao Cai (Shenzhen University, China).

12:20 1571348686: Quantum-Safe Security for Smart-City IoT: A Taxonomy of Cryptographic Approaches and Migration Strategies.
Dr. Qasem Abu Al-Haija; Prof. Khalid El Makkaoui, Dr. Qasem Abu Al-Haija (Jordan University of Science and Technology, Jordan), Prof. Khalid El Makkaoui (Mohammed Premier University, Morocco).

12:40 1571350788: Comprehensive Survey for Security-Reliability Trade-Off in Cognitive Radio Networks Under Eavesdropping Attacks.
Mr. Aws Ahmed Kadhim; Prof. Sattar B. Sadkhan, Mr. Aws Ahmed Kadhim (University of Babylon, Iraq), Prof. Sattar B. Sadkhan (Babylon University - IRAQ & Chairman of IEEE ComSoc Iraq Chapter, Iraq).

DAY -I: Tuesday, December 1 10:30 - 13:00 (Asia/Bahrain):

PARALLEL SESSION: SA02: ARTIFICIAL INTELLIGENCE COMPUTATIONAL ALGORITHMS: HEALTHCARE

SESSION JOINING: HALL-B

SESSION CHAIR DR. FAIZAL HAJAMOHIDEEN (UNIVERSITY OF TECHNOLOGY AND APPLIED SCIENCES, OMAN).

10:30 1571339965: Toward Reliable Alert Triage: A Rhythm-Fused Transformer for Smart-Hospital ECG Classification.
Mr. Mohamed Fekrouni; Prof. Saad Chakkor, Mr. Mohamed Fekrouni (Laborattory of Information and Communication Technologies (LabTIC) ENSAT Tangier, Morocco), Prof. Saad Chakkor (LabTIC, ENSA of Tangier, University of Abdelmalek Essaadi, Morocco).

10:45 1571357383: AI Implemented Early Diagnosis of Cardiovascular Diseases: A Systematic Review.
Dr. Faizal Hajamohideen, Dr. Faizal Hajamohideen (University of Technology and Applied Sciences, Oman).

11:00 1571355039: Explainable AI Framework for Emotion-Aware Distress Detection Using a Memory-Augmented Local LLM Chatbot.
Ms. Arundhuti Dey; Prof. Dhrubasish Sarkar, Ms. Arundhuti Dey (NSHM Knowledge Campus Kolkata, India), Prof. Dhrubasish Sarkar (Bhawanipur Global Campus, Kolkata, India).

11:20 1571354275: Reliable Knowledge-Grounded Synthetic Clinical Text Generation with Large Language Models: A Controlled Generation and Evaluation Framework.
Ms. Sedanur Sayer; Prof. Mehmet Karakose, Ms. Sedanur Sayer (Firat University, Turkey), Prof. Mehmet Karakose (Firat University, Turkey).

11:40 1571354239: EdgeOSA-X: Leakage-Aware Cross-Dataset TinyMLfor Sleep Apnea Detection and Severity Estimation from Single-Lead ECG.
Mr. Sudip Chatterjee; Anuja Kumar Acharya; Dr. Pronaya Bhattacharya; Dr. Anjan Bandyopadhyay, Mr. Sudip Chatterjee (Amity School of Engineering and Technology Amity University Kolkata India, India), Anuja Kumar Acharya (Kalinga Institute of Industrial Technology (KIIT) University, India), Dr. Pronaya Bhattacharya (Amity University, Kolkata, India), Dr. Anjan Bandyopadhyay (Kalinga Institute of Industrial Technology, India).

12:00 1571353514: Low-Cost EMG-Controlled Cable-Driven Exoskeleton for Smart Rehabilitation: Design and Experimental Validation.
Mr. Hasan Ahmed; Mr. Mohamed Saeed; Mr. Mohamed Abdulla; Dr. Said G Khan, Mr. Hasan Ahmed (University of Bahrain, Bahrain), Mr. Mohamed Saeed (University of Bahrain, Bahrain), Mr. Mohamed Abdulla (University of Bahrain, Bahrain), Dr. Said G Khan (University of Bahrain, Bahrain).

12:20 1571338564: A Comparative Machine Learning Framework for Multi-Class Diabetes Risk Prediction Using Clinical Features.
Mr. A Anandkumar, Mr. A Anandkumar (Jai Shriram Engineering College, India).

12:40 1571357451: AI-Driven Soil Health Assessment and Nutrient Optimization Using Machine Learning.
Gayathri S; Kanagavalli N; Dr. Ajitha Samuel; Dr. Surendran R; Dr. Balamurugan K S, Gayathri S (Karpaga Vinayaga College of Engineering and Technology, India), Kanagavalli N (Vel Tech High Tech, India), Dr. Ajitha Samuel (Sathyabama Institute of Science and Technology, India), Dr. Surendran R (Saveetha Institute of Medical and Technical Sciences, India), Dr. Balamurugan K S (SRM Bharathidasan College of Engineering and Technology, India).

CREATING SMART RESIDENTS IN SMART CITIES: 7 BEHAVIOUR CHANGE TIPS FOR PROMOTING RESPONSIBLE CITIZENSHIP

Speaker: Dr. Sameer Deshpande
Associate Professor, Social Marketing @ Griffith, Department of Tourism and Marketing
Griffith Business School, Griffith University, Marketing, Nathan, Australia.

Session Chair: Dr. Satveer Kour, Guru Nanak Dev University, India.

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

Poor civic sense, irresponsible citizenship, and a lack of awareness of smart technologies and ecosystems can lead to inappropriate behaviours, falling victim to financial and non-financial fraud, and the dismantling of high-quality city infrastructure. This presentation will share 7 behaviour-change tips, along with case examples of how government, nonprofit, and corporate organisations promoted appropriate behaviours among citizens to maintain established systems and ensure all residents can enjoy a good-quality urban life.

SPEAKER DETAILS: DR. SAMEER DESHPANDE:

Sameer Deshpande is an Associate Professor in the Tourism and Marketing Department in Griffith Business School, Griffith University. He is also the Deputy Director of Social Marketing @ Griffith. Over two decades in the area of 'marketing for a better world,' Sameer has taught, widely published in academic journals, books, and conference proceedings, reviewed, trained and consulted with government and non-profit organisations in India, Canada, Singapore, Australia, and the U.S. He is the Editor of Social Marketing Quarterly. Recently, he established the Asian Social Marketing Association in Singapore and serves as an advisor to the SOMAI Social Marketing Association of India. Sameer has raised over three million dollars and published studies testing the effectiveness of behaviour change initiatives using social marketing frameworks, with particular emphasis on a consumer-insights approach in a variety of contexts, including financial services to disadvantaged women, alcohol abstinence during pregnancy, safe sexual practices, promotion of alternative rides, responsible drinking, water rights, and physical activity. His book, co-authored with Nancy Lee, Social Marketing in India, has been well-received by the Indian academic and practitioner social marketing sector.

FROM SMART CITIES TO INTELLIGENT CITIES: LEVERAGING AI AND DIGITAL TRANSFORMATION FOR SUSTAINABLE URBAN FUTURES

Speaker: Professor Santosh Kumar Vishwakarma,
MTech, PhD, Professor and Dean (Data Science), Gyan Ganga Institute of Technology & Sciences, Jabalpur, India.

Session Chair: Dr. Ruchi Tyagi, Adjunct Asian Institute of Technology, Ex-Senior Faculty Birmingham City University,
Part Time Faculty University Technology, Mauritius

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

Smart cities are rapidly evolving from connected infrastructure and data-driven services towards intelligent, adaptive and human-centric urban ecosystems. The emergence of Artificial Intelligence, Generative AI, IoT, Digital Twins and Industry 4.0 technologies is transforming how cities plan, govern and deliver services, while simultaneously reshaping the skills and capabilities required by the supporting workforce. My keynote explores this transition from conventional smart cities to intelligent cities, focusing particularly on the convergence of technology, human capital and institutional transformation. It examines how AI and emerging digital technologies can contribute not only to intelligent mobility, energy management, healthcare, public safety and governance, but also to developing the human capabilities required to design, manage and operate these systems effectively. My talk will present a practical framework for developing AI-ready and future-ready urban ecosystems, built around three interconnected dimensions: intelligent infrastructure, intelligent governance and intelligent human capital. I will discuss how universities, industries, governments and civic institutions can collaborate to develop the skills, innovation ecosystems and lifelong-learning mechanisms required to respond to rapid technological change. My talk will also highlight the increasingly important role of higher education institutions as innovation and talent hubs for smart cities. I will discuss how universities can prepare students and professionals with competencies in AI, data analytics, cybersecurity, digital transformation, sustainability and interdisciplinary problem-solving, while strengthening industry-academia collaboration and creating a sustainable talent pipeline for future cities. My talk concludes with a practical roadmap for moving from technology-enabled smart cities to human-centric intelligent cities, where technology is an enabler of inclusive growth, sustainable development, employability, innovation and improved quality of life, rather than an end.

SPEAKER DETAILS: PROFESSOR SANTOSH KUMAR VISHWAKARMA:

Professor Santosh Kumar Vishwakarma is an academic leader, researcher and technology professional with extensive experience in higher education, academic administration, quality assurance, accreditation, industry–academia collaboration and emerging technologies. He is currently associated with Gyan Ganga Institute of Technology & Sciences, Jabalpur, and has been actively involved in institutional development, academic quality enhancement and initiatives focused on preparing students and faculty for the future of work. His areas of interest include Artificial Intelligence, Digital Transformation, Smart and Sustainable Cities, Industry 4.0, Quality Assurance, Outcome-Based Education, Innovation and Future Skills. He has been involved in academic and professional initiatives related to faculty development, curriculum transformation, industry interaction, accreditation and institutional quality improvement. His current work focuses on leveraging emerging technologies and quality-driven institutional practices to create future-ready educational ecosystems and strengthen the interface between higher education, industry and society.

SMART CITIES, SMART WORKFORCES: MEASURING AGENTIC AI'S IMPACT ON URBAN WORK AND TURNING DISPLACEMENT RISK INTO OPPORTUNITY

Speaker: Ravish Gupta
AI/ML Researcher
AI Led, BigCommerce | ex-Amazon (AWS Bedrock & Transform), Senior Member IEEE | M.S., Purdue University, USA.

Session Chair: Shefali Vishwakarma, IET - Communities Committee America, Vancouver, Canada.

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

Smart cities have transformed how urban centers manage transport, energy, health, and data, and cities are expected to generate more than 60 percent of global GDP over the coming twenty years. Yet the arrival of agentic AI, systems that complete entire workflows end to end rather than assisting with single tasks, is reshaping the urban workforce that produces that growth, and workforce intelligence has not yet joined the smart cities' agenda. This keynote presents the Agentic Task Exposure (ATE) framework, a task-level method for measuring how exposed each occupation in a city is to agentic AI, built from 18,796 work tasks mapped to the human abilities each one requires. Applied across major technology regions, the framework shows that exposure concentrates in white-collar cognitive work, that capital regions face pressure two to three years ahead of smaller cities, and that the steepest changes fall within today's planning horizon. The same analysis reveals the opportunity: new categories of work emerging in human-AI collaboration, AI governance, and domain-specific AI operations, roles that favor sector experience over programming skill. For smart cities, this means treating workforce data as core infrastructure alongside energy grids and transport networks: smart city planners who measure exposure at the task level can time reskilling programs, target the occupations that need them most, and route experienced workers into the supervisory roles agentic systems create. The talk closes with a practical workforce-planning blueprint for smart cities worldwide, drawing on applications of the framework in the United States and Korea and on open datasets available for any city or country, including the Gulf region, where fast-developing smart city infrastructure makes such planning both possible and timely.

SPEAKER DETAILS: RAVISH GUPTA

Ravish Gupta is an AI/ML researcher and Senior Member of the IEEE, based in Seattle, USA. He is Lead Software Engineer and AI Pillar Lead at Commerce.com (BigCommerce), where he designed the company's agentic AI infrastructure, and previously spent over eight years at Amazon Web Services, including work on AWS Bedrock and AWS Transform. His research on agentic AI and labor markets introduced the Agentic Task Exposure framework, with applications spanning the United States, Korea, and India, and open datasets used by researchers internationally, including at central banks and leading universities. His work on AI for mental health and multi-agent systems has been published in Springer LNNS and other venues, and he serves as a session chair and peer reviewer for international conferences.

BUILDING RESILIENT SMART CITIES - BALANCING INNOVATION AND CYBER RISK IN THE DIGITAL URBAN AGE

Speaker: Professor Dr. Shilpi Sharma,
Professor & Deputy Head, Department of Computer Science & Engineering
Amity School of Engineering & Technology
Amity University, Sector 125, Noida – 201303, UP, India.

Session Chair: Sandeep Kulkarni - Vice President Marketing and Sales Operations at Harbinger Group, India

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

As smart cities deploy IoT sensors, SCADA-integrated infrastructure, and AI-driven control systems, I've seen innovation consistently outpace the security architectures meant to protect it. In this keynote, I examine the expanding attack surface of smart cities specifically insecure edge devices, unpatched legacy protocols, and converging OT/IT networks. Emphasizing on real-world breaches in connected transportation, energy grids, and public safety systems. I will focus on zero-trust principles and secure-by-design engineering at the protocol. I'll share a practical framework for identifying systemic vulnerabilities before they cascade and make the case that resilient smart cities require security engineered as core infrastructure, not bolted-on compliance. A walk-through real-world case studies of infrastructure attacks, including breaches on connected transportation, energy grids, and public safety systems, to illustrate where architectural blind spots are exploited.

SPEAKER DETAILS: PROFESSOR DR. SHILPI SHARMA:

Dr. Shilpi Sharma is Professor and Deputy Head in the Department of Computer Science and Engineering at Amity University Uttar Pradesh, India, with over two decades of academic and research experience. She holds a Ph.D. in Computer Science and Engineering, with her research interests spanning Cyber Security, Network Security, Blockchain, Cloud Computing, Quantum Computing, and Cyber Law. She currently guides four Ph.D. scholars and has supervised one scholar who has successfully completed doctoral research. She has filed 12 patents, including international patents, with three patents granted, along with one copyright. She has authored and co-authored more than 90 research papers in reputed SCI, ESCI, and Scopus-indexed journals and international conferences. She is also the co-author of four books, co-editor of two academic books, and author/co-author of six book chapters in emerging technology domains. She has received the Best Paper Award for her research contributions and has presented her work at several national and international conferences. She is a member of IEEE, ACM Senior Member, IET, and IAENG. She actively contributes to the academic and research community as a Keynote Speaker, Session Chair, Conference Chair, Advisory Board Member, and Technical Program Committee Member.

WHAT CAN A SMART CITY SAFELY DISCONNECT?
USING SEGMENTATION AND ZERO TRUST TO KEEP ESSENTIAL SERVICES RUNNING

Speaker: Dr. Abdul Khadir Mahamed
OT Cybersecurity Architect, New York University, USA

Session Chair: Ms. Poonam Choubey, Assistant Professor, Sagar Institute of Research and Technology, India.

MAIN-THEATRE HALL – FOR VIRTUAL ACCESS

TALK ABSTRACT:

A municipal water utility suspects a cyber incident and needs to isolate a network connection while its pumps are running. Before acting, operators need to know whether they'll still see critical alarms, whether local controls will remain available, and who can authorize reconnection. This keynote follows the utility from isolation through recovery and shows how choices made during network design shape the options available to operators during an incident. Drawing on IEC 62443 zones and conduits, NIST guidance for operational technology security, and Zero Trust principles, the talk shows how engineering, operations, and cybersecurity teams can map critical dependencies, define what must keep running locally, and agree on what to verify before restoring access. Attendees will leave with a practical framework they can use to review a segmentation design or run a tabletop exercise for their own essential services.

SPEAKER DETAILS: DR. ABDUL KHADIR MAHAMED:

Dr. Abdul Khadir Mahamed is an OT Cybersecurity Architect with more than 14 years of experience in enterprise and industrial cybersecurity. He designs industrial network segmentation and secure vendor access for global manufacturing and distribution operations. He is currently pursuing a master's degree in cybersecurity at New York University (NYU) and created OT Security Studio, a browser-based learning platform for industrial cybersecurity practitioners.

16:30 1571352902: AI-Enabled Real-Time Digital Twin for Predictive Health Monitoring, Fault Diagnosis, and Reliability Enhancement of Critical Engineering Assets.
Dr. Udit Mamodiya; Mr. Rocky Kumar; Dr. Manimuthu Arunmozhi, Dr. Udit Mamodiya (Poornima University, India), Mr. Rocky Kumar (Poornima University, India), Dr. Manimuthu Arunmozhi (Aston Business School, United Kingdom (Great Britain)).

16:45 1571353789: Comparative Evaluation of Permittivity Extraction Models for a Low-Cost Open-Ended Coaxial Probe System Applied to Skin Tissue Characterization.
Mr. Luis Fernando Tupac Lazo; Ms. Lucia Fernanda Dávila Tejada; Mr. Manuel Alejandro Condori Huayna; Mr. Ebert G San Roman Castillo, Mr. Luis Fernando Tupac Lazo (Universidad Católica San Pablo, Peru), Ms. Lucia Fernanda Dávila Tejada (Universidad Católica San Pablo, Peru), Mr. Manuel Alejandro Condori Huayna (Universidad Católica San Pablo, Peru), Mr. Ebert G San Roman Castillo (Universidad Católica San Pablo, Peru).

DAY -III: Thursday, December 3, 13:30 – 15:30 (Asia/Bahrain)

SESSION JOINING: HALL-B

PARALLEL SESSION 03: SF03: DESIGN SOLUTIONS & SMART CITIES DESIGN-PART-B:

SESSION CHAIR: DR. MAS AYU HASSAN (UNIVERSITI MALAYSIA PAHANG AL-SULTAN ABDULLAH, MALAYSIA).

13:30 1571347945: Trust and Ethical Governance in the Metaverse.
Mr. Fahad Mira, Dr Mr. Fahad Mira, Dr (University of Bedfordshire, United Kingdom (Great Britain) & London, United Kingdom (Great Britain)).

13:50 1571355540: When Failure Data Vanish: Critical Evidence on Digital-Twin Vibration Analytics for Smart-City Maintenance.
Dr. Ahmad Shahir Jamaludin; Dr. Abdul Nasir; Dr. Mohd Nizar Mhd Razali; Mrs. Nurul Hasya Md Kamil; Dr. Mas Ayu Hassan, Dr. Ahmad Shahir Jamaludin (Universiti Malaysia Pahang Al Sultan Abdullah, Malaysia), Dr. Abdul Nasir (Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia), Dr. Mohd Nizar Mhd Razali (Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia), Mrs. Nurul Hasya Md Kamil (Universiti Malaysia Pahang Al Sultan Abdullah, Malaysia), Dr. Mas Ayu Hassan (Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia).

14:10 1571357467: Generative Artificial Intelligence in English Language Studies: A Framework for Enhancing Academic Writing and Language Learning.
Dr. Faizal Hajamohideen; Ms. Shaheena Jaleela Faizal, Dr. Faizal Hajamohideen (University of Technology and Applied Sciences, Oman), Ms. Shaheena Jaleela Faizal (Sohar University, Oman).

14:30 1571357462: Edge AI for Real-Time Decision Making in Precision Farming.
Dr. Balamurugan K S; Dr. S Divesh; Varshath Nikila B; Dr. Surendran R; Dr. B Keerthika, Dr. Balamurugan K S (SRM Bharathidasan College of Engineering and Technology, India), Dr. S Divesh (Dhanalakshmi Srinivasan University, India), Varshath Nikila B (Vel Tech Multi Tech, India), Dr. Surendran R (Saveetha Institute of Medical and Technical Sciences, India), Dr. B Keerthika (Karpaga Vinayaga College of Engineering and Technology, India).

14:50 1571357511: Evidential Semantic Attention Swin Transformer based Weed Detection for Internet of Things Scenario.
Mr. A Azhaguraj; Dr. Michael G, Mr. A Azhaguraj (Saveetha Institute of Medical and Technical Sciences, India), Dr. Michael G (Saveetha School of Engineering Simats Engineering Saveetha University, India).

15:20 1571357604: AI-Driven Predictive Frequency Stability and Self-healing Load Shedding Control.
Dr. Abdulla Desmal; Mudhi Mohammed; Ms. Naseba Nawaf Abdullah Mohammed, Dr. Abdulla Desmal (Bahrain Polytechnic, Bahrain), Mudhi Mohammed (Bahrain Polytechnic, Bahrain), Ms. Naseba Nawaf Abdullah Mohammed (Bahrain).

15:40 1571273637: AI-Powered Multi-Agent System for Enhancing Leader Engagement and Citizen Service Delivery.
Ms. Arunita Arun Chavanke; Dr. Amruta Mahajan; Chaitrali Chaudhary; Chinmay Desale; Om Dalvi, Ms. Arunita Arun Chavanke (Pimpri Chinchwad College of Engineering, India), Dr. Amruta Mahajan (Pimpri Chinchwad College of Engineering, Pune, India), Chaitrali Chaudhary (Pimpri Chinchwad College of Engineering Pune, India), Chinmay Desale (Pimpri Chinchwad College of Engineering Pune, India), Om Dalvi (Pimpri Chinchwad College of Engineering Pune, India).

16:00 1571276144: Low-Latency Distributed Architectures for Real- Time Non-QM Mortgage Underwriting.
Mr. Lakshya Jain, Mr. Lakshya Jain (Annaly Capital Management, USA & University of Illinois Urbana-Champaign, USA).

16:15 1571333358: From Public Space to Data Space: Examining Citizen Agency in Data-Driven Smart Cities.
Dr. Nazish Abid; Ms. Sagarika Nayak; Dr. Adiba Shafique; Ms. Ratna Ghosh, Dr. Nazish Abid (University of Bahrain, Bahrain), Ms. Sagarika Nayak (Canada), Dr. Adiba Shafique (University of Nottingham, United Kingdom (Great Britain)), Ms. Ratna Ghosh (Indian Institute of Technology, Kharagpur, India).

DAY -III: Thursday, December 3, 13:30 – 15:40 (Asia/Bahrain)

PARALLEL SESSION 04: SF04: DESIGN SOLUTIONS & SMART CITIES DESIGN-PART-C:

SESSION JOINING: HALL-D:

SESSION CHAIR: MS. SHOLEH MADANI, P.ENG., MIET, ABB INC. COQUITLAM, BC, CANADA

13:30 1571352260: CropSmart-ML: An Optuna-Tuned Stacked Ensemble Framework for Intelligent Crop Recommendation.
Mr. Aakash S S; Mr. Sukesh M; Mr. Ganesh Kumar A; Dr. Saran Raj S; Dr. Rajmohan Rajendran; Dr. Sunday Adeola Ajagbe, Engr, Mr. Aakash S S (Vel Tech Rangarajan Dr Sagunthala R&D Institute of Science and Technology, India) Mr. Sukesh M (Vel Tech Rangarajan Dr Sagunthala R&D Institute of Science and Technology, India), Mr. Ganesh Kumar A (Vel Tech Rangarajan Dr Sagunthala R&D Institute of Science and Technology, India), Dr. Saran Raj S (Vel Tech Rangarajan Dr Sagunthala R&D Institute of Science and Technology, India), Dr. Rajmohan Rajendran (SRM Institute of Science and Technology, India), Dr. Sunday Adeola Ajagbe, Engr (Abiola Ajimobi Technical University, Ibadan Nigeria, Nigeria & University of Zululand, South Africa).

13:50 1571351143: Quantum Computing for Analytics in Industry 5.0: A Comprehensive Review of Architectures, Algorithms, and Applications.
Mr. Osama Alabedallat; Ms. Neha Singh; Dr. Mamoon Rashid, Mr. Osama Alabedallat (Bahrain Polytechnic Campus, Isa town, Bahrain), Ms. Neha Singh (Manipal University Jaipur, India), Dr. Mamoon Rashid (Bahrain Polytechnic, Bahrain). .

14:10 1571349224: Knowledge-Enhanced Disaster Impact Classification and Response Recommendation.
Mrs. Zeynep Karaca; Prof. Ilhan Aydin, Mrs. Zeynep Karaca (Firat University, Turkey), Prof. Ilhan Aydin (Firat University, Turkey & Firat, Turkey). .

14:30 1571347731: Comparative Visualization of Shallow and Deep Convolutional Neural Networks Using Grad-CAM.
Mrs. Sheenam Middha Mrs. Sheenam Middha (Chandigarh University, India). .

14:50 1571343836: Cross-Platform Real-Time Acoustic Leak Localization in Urban Water Pipelines: Experimental Validation and Hardware Performance Analysis.
Dr. Ramasamy Srinivasagan, Dr. Ramasamy Srinivasagan (King Faisal University, Saudi Arabia). .

15:20 1571337208: Spectral Weight Topology Analysis for Execution-Free Integrity Verification of Serialized Machine Learning Models.
Ms. Malak Mekyassi; Ms. Bahiya Cheikh Mohamed Fadel; Mr. Taha Mahha; Mrs. Aboubakr Bajdid; Dr. Ibrahim Guelzim, Ms. Malak Mekyassi (ENSAM Casablanca, Morocco), Ms. Bahiya Cheikh Mohamed Fadel (ENSAM Casablanca, Morocco), Mr. Taha Mahha (ENSAM, Morocco), Mrs. Aboubakr Bajdid (ENSAM Casablanca, Morocco) Dr. Ibrahim Guelzim (Hassan 2 University of Casablanca, Morocco & National High School of Arts and Crafts, Morocco).
.

15:40 1571317760: AI-Driven Waqf Asset Management: A Governance Framework for Algorithmic Stewardship, Shariah Compliance, and Public Resource Accountability.
Dr. Pushan Kumar Dutta; Dr. Bratini Shome; Dr. Aniruddha Das; Mr. Vugar Abdullayev, Dr. Pushan Kumar Dutta (Amity University Kolkata, India & Amity School of Engineering and Technology, India), Dr. Bratini Shome (Amity University Kolkata, India), Dr. Aniruddha Das (Amity Business School, Amity University Kolkata, West Bengal, India) Mr. Vugar Abdullayev (Azerbaijan State Oil and Industry University, Azerbaijan). .

16:00 1571321415: Water wAIS: AI-Powered Leak Detection and Non-Revenue Water Reduction in Mumbai's Aging Water Distribution Network
Ms. Rhea Agrawal, Ms. Rhea Agrawal (CNS, India). .

DAY -III: Thursday, December 3, 15:30 – 15:40 (Asia/Bahrain) – Short Break

Wednesday, December 3 15:40 – 16:00 (Asia/Bahrain)
